Adult ed going strong

Since 1935, Pomona Unified School District's Adult and Career Education program has provided excellent adult education and career training for some of the most underserved members of our community.

As we mark our 75th anniversary this year, the need to provide adult students with relevant workforce learning opportunities and skills for employment has never been greater, especially as some school districts are closing their programs in response to state budget cuts.

PUSD's Adult Education program, however, is still going strong, and open to new students, both from Pomona and Diamond Bar and from neighboring areas, as well.

We offer a flexible and integrated educational system for adult learners that supports literacy and self-sufficiency, and promotes business growth, a competitive workforce, and economic prosperity for our state.

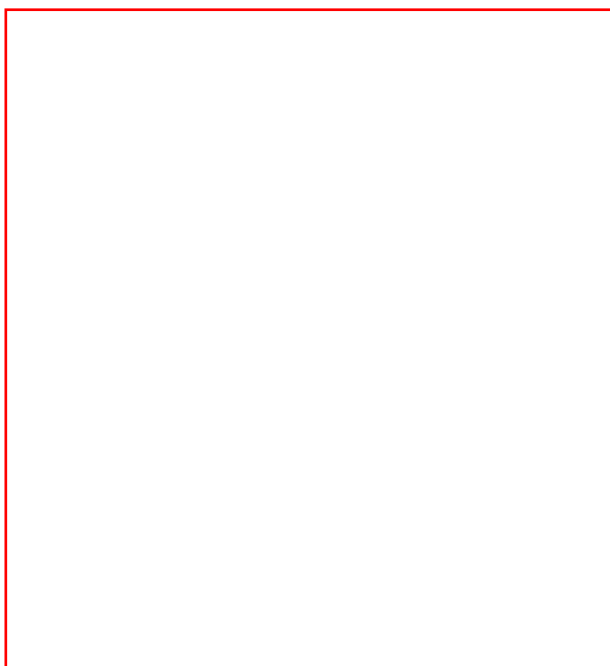

PUSD's Adult School helps people break the cycle of poverty by providing excellent, accessible and affordable education. As one of our students wrote recently, "As a low-income mother of three and also a CalWorks participant, I am very

honored to be enrolled in Adult Education. It is helping me better my life."

We welcome those adult students from other areas where programs are regrettably being closed. The door to opportunity for adult learners is still open at Pomona Unified. For more information, contact us at 909-469-2333, ext. 301.

ENRIQUE MEDINA

Director, Adult & Career Education, Pomona Unified School District
